

Electrical Panels

Services

Smitec provides turn-on key solutions complete with automation components and electrical control panel. The services provided include:

- Collection of technical specifications
- Definition of automation architecture
- Definition of schematic diagram using market recognized brands components
- Drawing of electrical panel layout
- Manufacture
- Electrical and functional test (if applicable)
- Packaging

Smitec is equipped with a climatic chamber from 0° to 55°C where the electrical panel prototype can be tested so as to define the most suitable refrigeration system needed.

Electrical panels in AISI304 and custom-sized electrical panels are also available upon request.
